

STAINLESS STEEL DIRECT (1" fittings) CYLINDERS (80 litre)

The Lycris-Byrne Direct Stainless Steel Cylinders are complete with 1" Cold Feed and 1" Expansion and a 3kW x 1 & 3/4" electric immersion heater. These cylinders are suitable for use in 'open vent' installations or in closed systems.

When installed in a closed (pressurised) system suitable expansion vessel, control valves and safety valves must be used.

- The cold feed and the expansion/hot water take-off are 1" female fittings.
- The external insulation complies with "Part L" of the Irish Building Regulations (Amendment) 2007.

Capacity:- 80 Litre

IMPORTANT:-

Electric Immersion Heaters may require further tightening prior to energising and testing.
Cylinders must be filled with water before the Immersion Heaters are energised.
Electric Immersion Heaters are fitted with a high limit safety cut-out.
