

TRIPLE COIL COPPER SOLAR CYLINDERS

The Lycris-Byrne range of Copper Solar Cylinders are suitable for use with solar panels, heat pumps or wind turbines in 'open vent' installations.

These cylinders are available as single coil, dual coil or triple coil.

The bottom coil has a surface area of 1.5 square meters.

There are three 1/2" ports giving provision for thermostats and temperature gauges.

The external insulation complies with "Part L" of the British Building regulations 2002.

Available sizes:-

60" x 15"	72" x 15"	
54" x 18"	60" x 18"	66" x 18"
54" x 20"	60" x 20"	66" x 20"

IMPORTANT:-

Electric Immersion Heaters may require further tightening prior to energising and testing.

The Solar Cylinder must be completely filled with water before Immersion Heaters are energised.

Electric Immersion Heaters are fitted with a high limit safety cut-out.
